

## **Meeting on Monday, October 5, 2016**

(1) Great Work Everybody.

(2) Special thanks to Joseph for providing the data and all useful programs. Data Science is becoming a big deal and he demonstrated Data Science and Visualization approaches.

(3) I also hope that Michael will continue pursuing the Bayesian approach. I did not see Bayesian approach implemented for such data. I am looking forward to this.

(4) Everybody will go with the proposed approaches or will propose other things.

We will see more data analysis next time when we meet (October 19, 11am). Please email me your work again Monday (October 17, 12 noon) before the next meeting.

Each of you will share the data analysis done so far.

We will answer the questions and try to identify unclear areas.

Looking forward to another great meeting.
